TOXICOLOGY

VOLUME CONTENTS

Volume 65 (1991)

Genotoxicity evaluation of lithium hypochlorite (Over-all evidence suggests that LiOCl is not genotoxic)
by M.L. Weiner, K.J. Batt, D.L. Putman, R.D. Curren and L.L. Yang (Princeton, NJ and Rockville, MD) ..... 1—22

Cellular response after mobilization of metals by diethyldithiocarbamate in rat hepatocyte cultures **(The complexing agent seems to protect cellular functions from metal-induced damage)**
by E. Hellström-Lindahl and A. Oskarsson (Uppsala, Sweden) ..... 23—32

A retrospective study of the molecular toxicology of benoxaprofen **(This is a computer-assisted approach to predict cytochrome *P*-450-mediated activation of xenobiotics)**
by D.F.V. Lewis, C. Ioannides and D.V. Parke (Guildford, U.K.) ..... 33—47

Induction of peroxisomal acyl CoA oxidase activity and lipid peroxidation in primary rat hepatocyte cultures **(Hepatocytes appear to be a suitable model system for studying relationships between peroxisome proliferation, hydrogen peroxide production and cellular changes caused by oxidative stress)**
by K.E. Tomaszewski, S.W. Heindel, W.L. Jenkins and R.L. Melnick (Research Triangle Park, NC) ..... 49—60

Absorption, distribution, excretion and metabolism of a single oral dose of [^{14}C]tri-*o*-cresyl phosphate (TOCP) in the male rat **(TOCP is readily absorbed from the GI tract and efficiently eliminated from the body of rats)**
by M.B. Abou-Donia, A.A. Nomeir, J.H. Bower and H.A. Makkawy (Durham, NC) ..... 61—74

Reproducibility of carcinogenic potencies estimated in different rodent species. Methylene chloride: A useful example **(A multistage mathematical procedure is described to compare methylene chloride in various species)**
by A.R. Bucchi, A. Loizzo and G.A. Zapponi (Rome, Italy) ..... 75—96

Correlation between acute toxicity of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD) and total body fat content in mammals **(A respective overview reveals correlations between logarithms of body fat and LD_{50} and allows cautious approximation to a LD_{50} in humans)**
by H.J. Geyer, I. Scheuntert, K. Rapp, A. Kettrup, F. Korte, H. Greim and K. Rozman (Neuherberg, Hannover, Paderborn and Freising-Weihenstephan, F.R.G. and Kansas City, KS) ..... 97—107

Formation of hemoglobin-benzo[*a*]pyrene adducts in human erythrocytes incubated with benzo[*a*]pyrene and hamster embryo cells **(Description of a model cellular system)**
by D.A. Haugen and I.S. Zegar (Argonne, IL) ..... 109—122

Induction of ethoxyresorufin-*O*-deethylase and inhibition of glucocorticoid receptor binding in skin and liver of haired and hairless HRS/J mice by topically applied 2,3,7,8-tetrachlorodibenzo-*p*-dioxin **(Use of two strains of mice seems to allow differentiation of two different receptors for TCDD)**
by S.J. Stohs, B.D. Abbott, F.H. Lin and L.S. Birnbaum (Research Triangle Park, NC) ..... 123—136

Effects of diabetes mellitus and aluminum toxicity on myocardial calcium transport **(Diabetes mellitus may be associated with decreased myocardial activity of calmodulin)**
by S.N. Levine, G.B. Sonnier and K. Abreo (Shreveport, LA) ..... 137—148

Induction of rat UDP-glucuronosyltransferase and glutathione *S*-transferase activities by L-buthionine-*S,R*-sulfoximine without induction of cytochrome *P*-450 **(BSO depletes hepatic glutathione and also increases the activity of conjugation enzymes)**
by B.W. Manning and M.R. Franklin (Salt Lake City, UT) ..... 149—159

Acute effects of cadmium and selenium on glucose output from rat liver hepatocytes using various gluconeogenic precursors **(Cd and Se affect hepatic gluconeogenesis and effects depend upon precursors used)**
by R.R. Bell, M.R.I. Soliman and J.L. Early II (Tallahassee,FL) ..... 161—168

Effect of 5-azacytidine on metallothionein inducibility and sensitivity to lethality of cadmium in rat osteosarcoma (ROS 17/2.8) cells **(The sensitivity of rat osteosarcoma cells to Cd can be reduced by exposure to 5-azacytidine)**
by D.J. Thomas, C.R. Angle and S.A. Swanson (Omaha, NE) ..... 169—178

Disposition and nephrotoxicity of 3-amino-1-hydroxypropylidene-1,1-bisphosphonate (APD), in rats and mice **(A description of the renal effects of the therapeutic agent against Paget's disease)**
by J.-C. Cal and P.T. Daley-Yates (Manchester, UK) ..... 179—197
Effect of di(2-ethylhexyl)phthalate on enzyme activity levels in liver and serum of rats **(Serum arylesterase, triglycerides and cholesterol are decreased, hepatic fatty acid transfers are increased)**
by H.A.A.M. Dirven, P.H.H. van den Broek and F.J. Jongeneelen (Nijmegen The Netherlands) ..... 199—207
Effects of inhaled acrylic acid derivatives in rats **(Inhalation of acrylates causes depletion of tissue sulfhydryl groups, urinary thioether excretion and hyperglycemia)**
by P. Vodička, I. Gut and E. Frantík (Šrobárova, Czechoslovakia) ..... 209—221
Pregnancy-associated changes in renal toxicity of cadmium-metallothionein: possible role of intracellular metallothionein **(At the end of pregnancy cadmium-metallothionein nephrotoxicity is high and renal metallothionein is low suggesting a relation between these phenomena)**
by J.P. Payan, A.M. Saillenfait, D. Beydon, M. Ban and J. de Ceaurriz (Vandoeuvre, France) ..... 223—232
Book review 233
Announcement 235

Review Paper
Toxicology of methacrylonitrile **(A brief discussion of chemistry, industrial use, human and animals toxicity, metabolism and mutagenesis/reproductive toxicity of methacrylonitrile)**
by M.Y.H. Farooqui and M.M. Mumtaz (Edinburg, TX and Cincinnati, OH) ..... 239—250

Research Papers
Strontium toxicity in *Drosophila melanogaster* **(The gene for Sr resistance has been located on the second chromosome)**
by M.W. England, J.B. Faust, E.K. Wilkerson and K.B. Jacobson (Oak Ridge, TN and Durham, NC) ..... 251—257
Effects of amiodarone administration during pregnancy in Fischer 344 rats **(Evidence for maternal and fetal toxicity is presented)**
by D.A. Hill and M.J. Reasor (Morgantown, WV) ..... 259—269
Pulmonary microsomal alterations following short-term low level inhalation of *p*-xylene in rats **(Five days after start of exposure, AHH activity is increased whereas other parameters return to normal)**
by D.M. Silverman and R.A. Schatz (Boston, MA) ..... 271—281
Validation of a non-invasive technique to assess development of airway hyperreactivity in an animal model of immunologic pulmonary hypersensitivity **(Airway hyperreacticity to histamine resulting from a pulmonary hypersensitivity is measured)**
by D.A. Griffiths-Johnson and M.H. Karol (Pittsburgh, PA) ..... 283—294
Reduction of glutamine synthetase activity in astroglia exposed in culture to low levels of inorganic lead **(Lead appears to delay astroglial maturation or differentiation)**
by E.M. Sierra and E. Tiffany-Castiglioni (College Station, TX) ..... 295—304
Carbaryl-induced changes in indoleamine synthesis in the pineal gland and its effects on nighttime serum melatonin concentrations **(Carbaryl increases pineal and decreases serum melatonin levels)**
by A.M. Attia, R.J. Reiter, K.O. Nonaka, M.H. Mostafa, S.A. Soliman and A.H. El-Sebae (San Antonio, TX and Alexandria, Egypt) ..... 305—314
A spin label study of the action of cupric and mercuric ions on human red blood cells **(Cupric and mercuric ions increase the rigidity of membranes)**
by K. Gwoździński (Lodż, Poland) ..... 315—323
Dose-response relationship between urinary cadmium and metallothionein in a Japanese population environmentally exposed to cadmium **(Urinary metallothionein is a more specific but less sensitive indicator of Cd-induced renal function than is urinary beta-2 microglobulin)**
by T. Kido, Z.A. Shaikh, H. Kito, R. Honda and K. Nogawa (Kingston, RI and Ishikawa and Chiba, Japan) 325—332
Combined lead acetate and disulfiram treatment-induced alterations of glial fibrillary acidic protein (GFA) immunoreactive astrocytes in brain smears **(Smear preparations of brain regions combined with computerized image analysis may be a useful tool for assessing toxic CNS damage)**
by J. Luthman, L. Olson, H. Björklund, A. Henschen, B. Hoffer and A. Oskarsson (Stockholm and Uppsala, Sweden and Denver, CO) ..... 333—346
Book Reviews ..... 347—348
Contents Relating to Toxicology ..... 349—352
Subject Index Volume 65 ..... 353—356
Author Index Volume 65 ..... 357—358
Contents Volume 65 ..... 359—360
